Checkweigher HSC350 "R" series
High speed checkweighing

R

Chain conveyors checkweigher created for use in extreme industrial environments

The HSC350 "R" series chain checkweigher combines unrivalled sturdiness, high precision and a design created for use in extreme industrial environments.

Created for use with boxes, cans and bottles in dry or wet environments, the "R" series checkweigher is sturdily built and features a chain conveyor mechanism that achieves the required degree of accuracy at an optimum speed.

A smooth on & off transfer is provided by the side transfer options allowing a convenient integration of the checkweigher alongside existing production lines.

The open design and stainless steel construction facilitate the cleaning and washing procedures.

The special high speed pusher ensure a delicate redirection without damaging the product, even if open or not sealed.

Product features

Maximum weight 1,500 g / 3,000 g / 6,000 g
 MID scale interval "e" 2 g / 5 g / 10 g
 Maximum product width up to 230 mm
 Maximum product length up to 200 mm
 Maximum throughput up to 600 ppm

Machine features

Supply voltage L1, N, PE, 230 V (+10% / -15%)
 Machine heights 500 to 1,400 mm (adjustable feet ± 50 mm)
 Operating temperature 0 - 40 °C
 Air supply 3 to 6 bar
 Environment protection IP65 (up to IP67)
 Belt Type Chain conveyors
 Control Panel High contrast lcd display with keyboard

Options

Connection RS232 COM, Ethernet, USB Data key
 Rejection Integrated pusher, Automatic feedback correction
 Statistics and reports STAT350 pc software, Integrated printer
 Control panel 7" HD color touchscreen, 10" wide color touchscreen
