Checkweigher HSC350 – Z Series
Fresh food applications

High speed checkweigher up to three channels sorting

The HSC350 Serie “Z” is an high speed checkweigher for small packages (punnets, chests, cans, small trays, ...) integrated with a sorting system capable of splitting product in up to three channels, usually divided as underweight, complying and overweight.

The quick and delicate “flipper sorting system” allows to shunt packages – even when open – without risk of damage or product overflow.

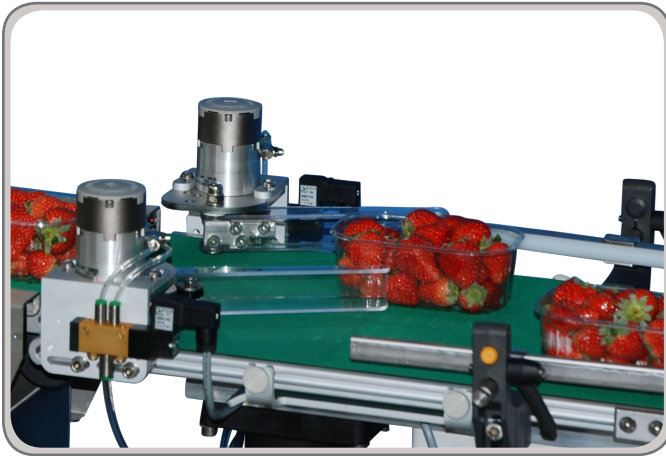

The standard configuration has four conveyor belts: first one capable of spacing incoming product and loading the second weighing belt. The weight is then accurately measured and package is transferred to third conveyor when it is sorted according its weight.

The fourth belt – available in intralox – allows the operator to manually correct the package’s weight adding or removing product to obtain the exact target weight.

Product features

Maximum weight
MID scale interval “e”
Maximum product width
Maximum product length
Maximum throughput

1500 g / 3 kg
0.5 g / 1 g
up to 220 mm
up to 300 mm
up to 120 ppm

Machine features

Supply voltage
Machine heights

Operating temperature
Air supply
Environment protection
Belt Type
Control Panel

L1, N, PE, 230 V (+10% / -15%)
500 to 1,400 mm (adjustable feet ± 50 mm)
0 – 40 °C
3 to 6 bar
IP54 (up to IP68)
Flat “food”
High contrast lcd display with keyboard

Options

Connection
Rejection

Statistics and reports

Control panel

RS232 COM, Ethernet, USB Data key
Integrated pusher, Automatic feedback correction
STAT350 pc software, Integrated printer
7” HD color touchscreen, 10” wide color touchscreen
