

The PackPod is a low cost, revolutionary device for semiautomatic case packing, forming and sealing of RSC style cases and its many variations allowing for stunningly small size, flexibility, reliability and ergonomics.

Cases are formed, packed, sealed and palletised all in one place!

pre-staged tape is instantly stamped on to the case

products are conveyed to box edge

sealed box is palletized without walking

palletized cases

flat boxes -
no preforming needed

*packpod also doubles as a 10 per minute carton erector

10 case per minute carton erector

Tape is bonded instantly, size changes in less than 1 min.

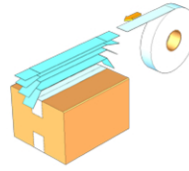

A revolutionary simple answer for tape erecting cases. Ergonomic waist high forming, cases are delivered back into the packers hands.

Nominal case sizes

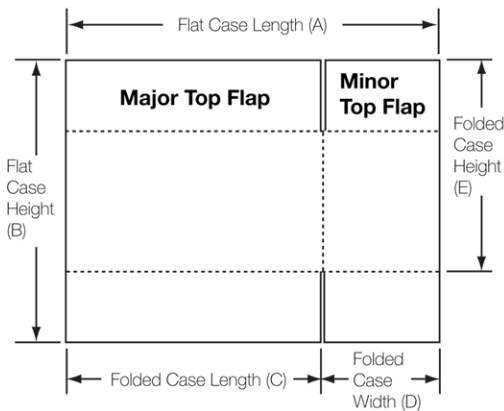

“The Simplest Solution”

Premetered tape is instantly and tightly pressed onto the case

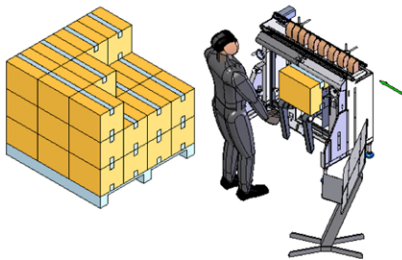

LENGTH		WIDTH		HEIGHT	
MINIMUM	MAXIMUM	MINIMUM	MAXIMUM	MINIMUM	MAXIMUM
8.0" (203mm)	24.0" (609mm)	6.0" (152mm)	16.0" (406mm)	3.5" (89mm)	18.0" (457mm)

Detailed case size range

	MIN.	MAX.
A	14.0" (356mm)	40.0" (1,016mm)
B	9.5" (241mm)	34.0" (863mm)
C	8.0" (203mm)	24.0" (609mm)
D	6.0" (152mm)	16.0" (406mm)
E	10.5" (266mm)	26.0" (660mm)

PackPod Packing Cell

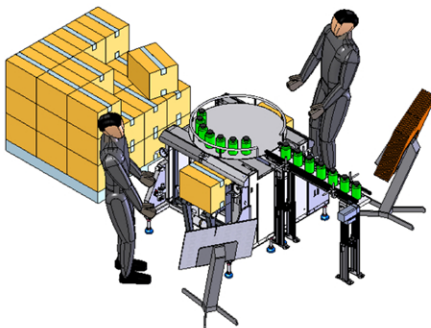

The PackPod was designed to be the most compact and efficient method of implementing basic automation to case packing.

Advantages:

- No pile of pre-made boxes.
- Replaces a handpack table.
- No extra floorspace required.
- No re-positioning of nearby machinery.
- Perfectly sealed, professionally appearing cases.
- All operations performed in one place:
 - the operator palletizes the finished case with a minimum of walking and lifting.
- Very ergonomically friendly.

Multiple PackPod line

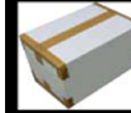

If more throughput is required, two or more PackPods can achieve throughput of a more complex and expensive automated line with the same or less labor requirements.

Advantages:

- Compact footprint and portability allows for flexibility in line layout.
- Quick ROI and very low total cost of ownership
- Much better ergonomics vs. automated line above.
- Quick and easy box size changes. - Under two minutes.
- Minimal maintenance.

PackPod is immensely more forgiving and can seal cartons that other automatic machines won't touch!

UNIQUE CAPABILITIES

'H' Taped Boxes

Seals all seams - dust, vermon & pilfer proof

Gap Flapped Boxes

1 or 2 tapes can be used to seal gap flapped boxes to save material

Multi Trip Boxes

Packpod can seal even well used multitrip boxes as well as out of spec cases

'Reverse Flap Folding

Smooth floor avoids cutting or indenting delicate products
