Forefront of checkweighing technology
"Tailor-made" solution for your product

The HSC350 "C" series checkweigher is the compact, modular, cost-effective solution that integrates the quality control line when space is at a premium.

Sturdy and flexible, it can be easily fitted with a Metal detector plus display and labelling systems.

The system can be easily sanitized and hygienized thanks to its special shape, featuring flat, easily accessed surfaces.

Thanks to the innovative "Real Weight" dynamic measuring system, HSC350 can be used without the need for the calibration or product learning procedures required by the majority of the "peak weight" weighing machines available on the market.

Easy-to-use and intuitive software interface allows quick change of data and secure operations protected by password: up to 100 programs are saved in checkweigher's memory.

Product features

Maximum weight	1500 g / 3 kg / 6 kg
MID scale interval "e"	0.5 g / 1 g / 2 g
Maximum product width	up to 420 mm
Maximum product length	up to 500 mm
Maximum throughput	up to 250 ppm

Machine features

Supply voltage	L1, N, PE, 230 V (+10% / −15%)
Machine heights	500 to 1,400 mm (adjustable feet ± 50 mm)
Operating temperature	0 – 40 °C
Air supply	3 to 6 bar
Environment protection	IP54 (up to IP68)
Belt Type	Flat "food"
Control Panel	High contrast lcd display with keyboard

Options

Connection	RS232 COM, Ethernet, USB Data key
Rejection	Integrated pusher, Automatic feedback correction
Statistics and reports	STAT350 pc software, Integrated printer
Control panel	7" HD color touchscreen, 10" wide color touchscreen
