

AUTOMATIC HORIZONTAL NETTING MACHINE WITH CLIP - VEGA

VEGA is an automatic, high efficiency packing machine. It is very versatile and can work with a wide range of products (vegetables, citrus and fruits) that are packed in a tubular net and closed by metal clip (both knitted and extruded). VEGA can pack loose products up to 2 kg, but it can work also punnets, trays and small cartons. The machine can apply to the package a wineglass labels and a tape with the function of handle.

Useful for processing of products which: zucchini, peppers, cucumbers, aubergines, carrots, apples, melons, avocado, oranges and citrus, pears, onions, garlic, potatoes, chestnut, mushrooms, all products can be contained in punnets/trays and so on.
